UNESCO World Heritage Site

Touristic Offers

Hundreds of coal mines produced coal in the Ruhr Area, but only one was declared a UNESCO World Heritage Site in 2001. For good reason: the Zollverein coal mine is a masterpiece of mining architecture and a completely preserved synthesis of the arts. Zollverein is regarded as the "most beautiful coal mine in the world".

The famous twin pithead frame impressively represents the change of a whole region. About 1.5 million guests from all over the world visit the site every year to experience the exceptional industrial architecture, participate in guided tours, visit exhibitions, celebrate festivals or relax in the Zollverein Park
