

Call-for-Papers for the 10th International Ruhr Energy Conference (INREC)

Climate Finance and Energy Markets

September 15-16, 2021, Digital Conference

Conference objectives

The conference brings together academics, regulators and practitioners who investigate the various sources of uncertainty and risk in Energy and Financial Markets. A special focus will be on the implications of climate change on these markets. Contributions from all areas of energy-related research in economics, finance, engineering, social sciences and mathematics are welcome.

Conference topics

- Alternative climate policies
- Climate-related stress tests
- Commodity prices and world economy
- Data and Statistics for climate finance
- Energy data and digitization
- Energy forecasting and modelling
- Energy market (dis-)equilibria
- ESG investing
- Financing energy infrastructure
- Investor types and climate risk
- Low carbon energy futures
- Market efficiency and climate change
- Pricing climate change uncertainty
- Regulation and regulatory risk
- Risk measurement and management
- Stochastic processes in energy

After careful consideration of all **aspects we decided to host INREC 2021 as a completely digital scientific conference**. The participation fee is 20€. The conference language is English.

Please use the following link www.inrec.org for **registration and abstract submission** (300 to 500 words). We are happy to announce that the GEE awards a prize of 500 Euro for the best full paper submission.

Dates and Deadlines:

Ext. abstract submission deadline: June 21, 2021
Abstract admission notification: July 05, 2021
