Call-for-Papers for the 11th International Ruhr Energy Conference (INREC)

Uncertainties in Energy Markets

September 27-28, 2022, Essen, Germany

Conference objectives

Energy and electricity markets are characterised by a variety of long- and short-term risks and substantial uncertainties. Points in case are the Russian aggression against Ukraine, the accelerating switch to clean energy in Europe, as well as the transition and physical risks of climate change. Thorough investigations of various sources of uncertainty and risk in energy and financial markets are a key priority for researchers and practitioners. We welcome contributions from all areas of energy-related research in economics, finance, engineering, social sciences, data science and mathematics.

Conference topics

- Energy forecasting and modelling
- Energy innovations and energy markets
- Risk measurement and management
- Data science for energy and climate finance
- Energy data and digitization
- Energy analytics
- Energy market (dis-)equilibria
- ESG investing
- Financing energy infrastructure
- Climate policy and risk
- Low carbon energy futures
- Market efficiency and climate change
- Pricing climate change uncertainty
- Regulation and regulatory risk
- Risk measurement and management
- Stochastic processes in energy

The regular participation fee is 200€. The student fee is 100€. The conference language is English. We are closely following the COVID situation and modify the conference procedure if necessary. The INREC is planned primarily as a face-to-face conference.

Please use the following link www.inrec.org for **registration and abstract submission** (300 to 500 words). We are happy to announce that the GEE awards a prize of 500€ for the best full paper submission.

Dates and Deadlines:

Abstract submission deadline: July 04, 2022

Abstract admission notification: July 18, 2022
